

Complete Streets Implementation Resource Guide for Local Agencies

Complete Streets is a transportation approach that provides safe access for all street users regardless of age or ability. This movement continues to gain momentum as communities across the nation plan and design roadways that safely and efficiently accommodate pedestrians, bicyclists, motorists, transit riders, and motor vehicles.

The [Complete Streets Implementation Resource Guide for Minnesota Local Agencies](#) is a new tool that helps transportation professionals, advocates, and decision makers understand and implement Complete Streets policies in their communities. Funded by the Minnesota Local Road Research Board, SRF Consulting Group, Inc. collaborated with city and county engineers, MnDOT staff, and University of Minnesota researchers to develop this comprehensive guide, which features the following information and resources:

- Complete Streets Overview
- Local and National Best Practices
- Terms and Definitions
- Assessment of Current Practices
- Implementation Guide/Process
- Local Case Studies

The *Complete Streets Implementation Resource Guide for Minnesota Local Agencies* is available at the following link: <http://www.lrrb.org/media/reports/2013RIC02.pdf>.
